Atomic Spectacular (EX)	Prepare for an adventure into the heart of science with Atomic School's Atomic Spectacular! This all-ages show combines jaw dropping demonstrations with captivating storytelling to make science unforgettable. It showcases science's Biggest Ideas as the elements of the Periodic Table burst to life revealing their mind-blowing properties. Witness a hydrogen balloon ignite in a spectacular explosion, or marvel at liquid nitrogen's subzero magic. Feel the excitement as stage fog morphs into a toroidal vortex, then fired toward the audience for an interactive thrill bringing science to life! Led by Ian Stuart, Atomic School's founder and a celebrated science educator, this 60- minute show is perfect for families, students, and science enthusiasts. Your child will discover that just 92 different kinds of atoms make up their entire world. That they're invisibly tiny. Each has its own shorthand symbol made of one or two letters, and each has its own special number, called its Atomic Number which is its place in the list going from lightest to heaviest atoms. Wonder at the Universe's lightest atoms, hydrogen (Atomic Number 1) and helium (Atomic Number 2), formed in the first few minutes after the Big Bang, 13.8 billion years ago. In fact, their bodies (and yours) are made of the same hydrogen atoms that formed at that time, making them (and you) as old as the Universe itself. This show is teeming with ideas and demonstrations that will leave a lasting impression.
Freakier Friday (PG)	Tess and Anna discover that lightning may indeed strike twice as they navigate the myriad challenges that come when two families merge.
The Naked Gun (M)	Only one man has the particular set of skills... to lead Police Squad and save the world!
Bride Hard (M)	Sam (Rebel Wilson) is a world-class secret agent... and a pretty terrible maid of honor. After blowing off bridal duties for an international spy mission, she's demoted to bridesmaid at her childhood best friend's wedding. What should've been a weekend of reconnecting and celebration turns into a five-star death trap when armed mercenaries crash the big day. Sam's the only one who can save the bride, and hopefully earn back the trust she lost along the way. Dodging bullets and trying not to ruin the floral arrangements, Sam takes on the ultimate wedding crasher, realizing that sometimes the toughest mission isn't taking down the bad guys, but showing up for the people who matter.
Weapons (MA15+)	When all but one child from the same class mysteriously vanish on the same night at exactly the same time, a community is left questioning who or what is behind their disappearance.
